

NIV OZER

Computer Science Graduate – Fullstack Developer

Graduated with a BSc in Computer Science, now looking for my first full-time role in software development. I have practical experience from academic projects, focusing on building applications. Interested in Fullstack development and eager to learn and contribute.

EXPERIENCE

Work:

March 2023 – March 2024:

Student Position - Field Operation Engineer with contributions in Python, JS Tasks and UI/UX at Catch.

Key Projects:

Dynamic Automata Visualizer using React:

Developed a dynamic React app with Next.js to visualize automata based on OpenAI REST API.

English Tutoring React-Native App:

Designed and built a React Native app for private English tutors, focusing on engaging UI/UX. Utilized Tailwind CSS for styling.

Anime "Binger" Chrome Extension:

Created a TypeScript based Chrome extension using React and Tailwind CSS for streamlined anime browsing and watching experience in Hebrew.

Brainy a math tutoring Android app:

made with Kotlin in Android Studio, using Firebase for data management. Brainy provides interactive math exercises for children, making learning fun and effective.

Password Manager Kotlin App in Android Studio

EDUCATION

Present

Computer Science B.Sc - H.I.T (Holon Institute of Technology)

Courses with extracurricular activities:

- OOP – A C# based web game managed end-to-end from planning to publishing.(C#)
- Data Science - Made a prediction module for NBA's MVP prospects (Python)
- Machine Learning – Gender detection algorithm based on stories (Python)
- Client-side and app Development – android App (Android Studio & Kotlin)

2020:

Discrete mathematics course in The Open University of Israel

Self-Taught:

- Interactive Chrome Extension (JS)
- MERN – MongoDB, Express.js, React.js, Next.js
- Figma, Adobe Photoshop, Premier
- Swift (iOS Development)
- PHP

Military:
