

NIV OZER

Junior Unity Developer

Junior Unity Developer with a BSc in Computer Science, proficient in C# and game development. Experienced in crafting engaging 2D/3D games and learning best practices. Eager to start my career and grow as part of a talented game development team

EXPERIENCE

Work:

March 2023 – March 2024:

Field Operation Engineer with contributions to innovative designs and UI/UX at Catch.

Key Projects:

Pass-Through (3D Puzzle Maze)

Developed a mobile 3D puzzle game with smooth flight mechanics.

Implemented level transitions Data Persistence and scene management.

Falling Swords (2D Platformer Survival)

Created an endless survival game with object pooling for performance optimization.

Designed a power-up system with temporary invincibility.

Chicken Invaders Remastered (2D Arcade Shooter)

Remastered the classic game with improved mechanics and UI.

Implemented enemy AI, power-ups, and a scoring system.

EDUCATION

Present

Computer Science B.Sc - H.I.T (Holon Institute of Technology)

Unity's Official Course – Road to Junior Unity Programmer

Courses with extracurricular activities:

- OOP – A C# based web game managed end-to-end from planning to publishing.(C#)
- Data Science - Made a prediction module for NBA's MVP prospects (Python)
- Machine Learning – Gender detection algorithm based on stories (Python)
- Client-side and app Development – android App (Android Studio & Kotlin)

Self-Taught:

- Unity (2D & 3D Game Development) – Built multiple games from scratch, focusing on gameplay mechanics, physics interactions, and level design.
- C# Scripting – Writing clean, reusable code for game logic, player controls.
- **Object Pooling** & Optimization – Improving game performance by managing memory efficiently.
- **Data Persistence & Scene Management** – Implemented save/load systems and seamless level transitions.
- Game UI/UX Design – Designed intuitive interfaces using Unity UI, animations, and responsive elements.
- **Shaders & VFX Basics** – Experimented with Shader Graph and particle effects to enhance visuals.

Military:

2016– 2019: IDF Draft Department Commander

Achievements/Tasks:

- Commanding 11 combatant soldiers
- Multitasking in stressful situations
- Operating Patriot Air Defense systems

CERTIFICATES

Intro to Entrepreneurship & Innovation - 02/2022 - 04/2022

HIT's Entrepreneurship program in collaboration with Future institute founded to study and create ties between academia and the industry

SKILLS

Game Development:

Unity (2D & 3D)

Object Pooling, UI/UX Design

Data Persistence between

Scenes/Sessions

Scene Management & Level

Transitions

Prefabs & Asset Management

OOP Principles

Programming & Backend:

C# ,

C,

.NET

Python, AI – Sklearn Proficiency

Web Development – (HTML, CSS,

JavaScript, Typescript, React, , Node.js,

Express.js

Mobile - Kotlin, Swift, React-Native

MongoDB

Personal Skills:

Math : Familiar with basic Linear

Algebra functions related to 3D space

(DotProduct , Transformation ...)

Networking, Data & Market Research

LANGUAGES

Hebrew:

Native or Bilingual Proficiency

English:

Native or Bilingual Proficiency
